Digital content is an asset and a liability. ZONTAL Space was designed to protect, preserve, and enable reuse of digital contents. In intra-industry approach, we applied best practices and standards developed by preservation experts from the library archiving industry to solve digital preservation challenges within the Pharmaceutical industry. The resulting product combines highest quality software engineering with best academic insights to deliver a truly robust and scalable solution to digital preservation in all industries.

Open standards and guidelines like ISO 14721: Reference Model for Open Archival Information Systems (OAIS), ISO 16363: Trustworthy Repositories Audit and Certification (TRAC), and EMA “Best Archiving Practice” (BAP) are the design basis of ZONTAL Space. According to NDSA classification, the technical implementation fulfills all level 4 requirements, and even exceeds them.

Your data will double - within the next 3 years. ZONTAL Space is designed to scale with your demands and gets you ready for the exabyte age. We combine object storage for scalable online storage, redundancy and safety to avoid the needs for backup. In addition, low cost off-line storage is possible providing full cost control. ZONTAL Space semantic technologies enable unparalleled contextual metadata enrichment for unprecedented data discovery. Kubernetes container

orchestration let's ZONTAL Space run anywhere, be it in the cloud or on-premises. The advantage for you are elastic scale, resilience and automatic failure recovery. All our modules are exposed as REST web services and are designed to integrate smoothly into any application landscape. This allows a maximum of workflow automation, making redundant manual efforts obsolete.

ZONTAL Space adjusts to your individual needs, completely on the configuration level. With finely granular security policies, detailed support for all your critical roles like Producer, Archivist, and Consumer is enabled. Our intuitive UI allows end users to experience “dropbox” like ingest, with highly customizable metadata schemas. ZONTAL Space was designed for users, with users, and is ready to serve as you need it.

ZONTAL Space goes beyond data protection and leverages sophisticated data standardization and harmonization protocols that ensure long term data value and interoperability for data reuse. All assets within ZONTAL Space burst the constraints of classical archiving, they are fully accessible and ready for data analytics.

**It is time to explore ZONTAL Space.**

**Simply schedule a demo with us.**

# ABOUT ZONTAL

Data is an asset and a liability.  
ZONTAL provides the most advanced solutions for compliant management of integrated data. As emerging market leader, we provide enterprise solutions for Pharma and Life Sciences that transform data into interconnected information, on a global scale.

# ZONTAL TEAM

**WOLFGANG COLSMAN | Founder & Chief Executive Officer**

Wolfgang has 15+ years' experience in life sciences, he invented the Allotrope Framework and leads best practices and standards for data exchange and archiving

**DENNIS DELLA CORTE | VP Marketing & Sales**

Dennis is a data science expert with 5+ years of experience in Big Pharma. He is passionate about enabling minds and machines through best in class ML and AI

**Manfred Voglmaier | Chief Revenue Officer**

Manfred's expertise lies in successfully developing and implementing effective sales strategies. He has a strong track record in the Pharma and Life Science Industry and always delivers the highest quality sales and business solutions.

We are excited to meet you in person to provide additional insights into our products.
